### Mission Statistics - Logged-in Players Only

Mission: Demo Mission

The vast majority of players will not log in. Instead, they will choose to play as a guest. Please refer to the Statistics on Total Users and Downloads in the previous section for information on players, downloads, and other aggregate data.

Data relating to individual players will only be recorded if players have logged in. General Mission data (such as downloads) does not require players to be logged in. Please encourage players playing your Mission to log in to their account when playing Agents of Discovery. To ensure logged in player data is synced when out of WiFi or mobile data range, logged in players should close and open the game once they have reconnected.

<sup>1</sup>Players commonly play AoD together in groups on one device. To get a better idea of how many players are visiting your Mission, we estimate user statistics by multiplying the number of downloads by 2.8.  
<sup>2</sup>Data may be affected by variations in internet connectivity, whether a user has logged in since playing the Mission, and whether a user's account has been verified.  
<sup>3</sup>Statistics regarding age do not include all logged in players, only those who have provided a birth year.
